

4Life Transfer Factor[®] RioVida[™]

A LIQUID POWERHOUSE

Taste Life!

Home to colorful Macaws and lush palm fronds, the Brazilian rainforest teems with life. Yet the nutritional secret of the Amazon lies deep beneath the forest's mossy floor in its fertile, untapped soil. The wholesome fruits grown in this soil, particularly the deep purple richness of the açai berry, inspired 4Life entrepreneur David Lisonbee to consider the wellness partnership of the century—a union of 4Life Transfer Factor's immune-enhancing benefits with the nutritional boost of nature's strongest energy fruits.

This union took form in the shape of 4Life Transfer Factor RioVida. Portuguese for River of Life, RioVida is a new liquid revolution that blends the potency of the Transfer Factor E-XF with pure juices. By adding the rich nutrition of açai, blueberries, pomegranates, elderberries and purple grapes to the energizing flow of transfer factor, RioVida delivers a powerful rush of vitality.

Key Points

- **Transfer Factor E-XF:** Transfer factors are tiny messenger molecules that transmit, or transfer, healthy immune knowledge to your body. Transfer factors support natural immune responses, including your body's ability to remember past invasions.

Developed exclusively by 4Life using patented and patent-pending technology, the Transfer Factor E-XF blend calls upon the immune knowledge of two sources, providing an enhanced combined effect of transfer factors from both cow colostrum and egg yolks. Research shows that the immune-building effects of this transfer factor blend are more potent than that of colostrum or egg sources alone. In fact, in an independent study, the 4Life Transfer Factor E-XF blend increased human Natural Killer (NK) cell activity 283 percent.¹

- **Potent Antioxidant Protection:** The RioVida formula was developed to both excite the senses and nourish the body with an intense concentration of active ingredients. Offering an exotic blend of "superfoods," the fruits found in RioVida also contain powerful phytonutrient antioxidants called anthocyanins, omega fatty acids, flavonoids, ellagic acid and tannins, all that support healthy cardiovascular, digestive, urinary and immune system functions.

Vitamin C and lactoferrin, a beneficial milk protein, were added for their fortifying antioxidant properties and increased immune system support.

- **Effective and Convenient:** 4Life Transfer Factor RioVida is the first liquid dietary supplement with the immune-supporting ability of Transfer Factor E-XF. Its smooth and refreshing delivery system is perfect for people on the go and makes it easier than ever to receive your daily supply of immune-enhancing 4Life Transfer Factor along with a potent source of free-radical fighting antioxidants. With RioVida's fantastically delicious flavor, health never tasted so good!

Did you know?

Antioxidants are nature's way of rebuilding and restoring molecular health. By bonding with free radicals, the natural by-product of oxygen, sunlight, and other environmental conditions, antioxidants promote balance and molecular regeneration in the body.

Technical Points

- 4Life researchers and scientists developed the Transfer Factor E-XF proprietary blend in an effort to further maximize immune system support using transfer factor molecules.
- The essential fatty acid complex of the açai berry resembles that of olive oil, thought to contribute to the maintenance of ideal heart health in Mediterranean populations.
- Austrian endocrinologist Dr. Sepp Porta tested the influence of elderberries in promoting healthy stress levels. Dr. Porta found that a 10-day concentrated dose of elderberries was considerably effective in regulating stress levels.
- Free radicals are caused by oxidation and result naturally from sunlight and exposure to the oxygen in the air. Once formed, they can do damage to both DNA and cell integrity. For this reason, free radicals are known to interfere with good health and promote aging.
- Antioxidants are nature's way of protecting and restoring molecular health. Antioxidants interact safely with free radicals and stop their chain reaction. Because the body cannot manufacture antioxidant nutrients, it's vital they be supplied through diet.

1. Test results obtained from a blind study directed by Dr. Anatoli Vorobiev at the Russian Academy of Medical Science.

DIRECTIONS: Drink one or more ounces daily.
Serving Size: 1 fl. oz (30 ml)
Servings Per Container: 16

Supplement Facts

Amount Per Serving		%DV*
Vitamin C	125 mg	200%
Transfer Factor E-XF[™]	600 mg	**
A patented concentrate of transfer factors and other natural components from cow colostrum and egg yolk.		
Lactoferrin	60 mg	**
RioVida Juice Blend	15 mL	**
Açai, Pomegranate, Blueberry, Elderberry, Grape, Apple		

*Reference Daily Intake (RDI)

**Daily Value (DV) not established

Natural Preservatives: lysozyme, lactoperoxidase.

Other Ingredients: natural fruit flavors.

Use within 30 days of opening.

Shake well before each serving.

Refrigerate after opening.
